

KANGOGO EVANS

Full-Stack Developer & Remote Software Engineer

Nairobi, Kenya | +254 745 909 218 | kangogo6074@gmail.com

GitHub: <https://github.com/sketch-tech-gif>

Portfolio: <https://sketch-tech-gif.github.io/my-portfolio>

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience designing, building, and deploying web applications using React, Node.js, Express, and MongoDB. Skilled in delivering complete end-to-end solutions, including requirements gathering, system design, development, and deployment.

Remote-ready professional available during EST/CET business hours, with a proven ability to deliver functional, client-focused applications for real business needs under tight budgets. Strong in debugging, API integration, and full-stack testing, with a focus on performance, reliability, and clean, maintainable code.

CORE TECHNICAL SKILLS

- **Frontend:** React.js, HTML5, CSS3, JavaScript (ES6+), responsive web design
- **Backend & APIs:** Node.js, Express.js, RESTful API development, JWT authentication
- **Databases:** MongoDB, Mongoose (schema design & data modeling), Firebase
- **Deployment & Hosting:** Vercel, Render, Firebase Hosting, domain setup, environment configuration
- **Testing & Debugging:** Postman (API testing), Chrome DevTools, manual QA, error tracing and debugging
- **Development Tools:** VS Code, Git, GitHub, npm/yarn, MongoDB Atlas, Notion, Canva, Excel
- **System Design:** Requirements gathering, ER diagrams (ERDs), use cases, basic system architecture

- **Networking:** Basic LAN/Wi-Fi setup, IP configuration, router setup and troubleshooting

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer & Systems Designer

Self-Employed | Nairobi, Kenya | 2025 – Present

- Design, develop, and deploy full-stack web applications for SME clients
 - Architect backend systems using Node.js, Express.js APIs, and MongoDB
 - Deploy and maintain production applications using Vercel and Render
 - Translate business requirements from non-technical clients into functional systems
 - Perform API testing and debugging using Postman and browser DevTools
-

IT Support Technician (Freelance)

Self-Employed | Nairobi, Kenya | 2025 - Present

- Provided computer setup, software installation, and troubleshooting support for clients
- Assisted users with Microsoft Office, email configuration, and basic productivity tools
- Configured and maintained basic LAN/Wi-Fi networks and router setups
- Resolved hardware and software issues to ensure system reliability and uptime

SELECTED PROJECTS

1) TechStore – E-Commerce Web Application

□ <https://sketch-tech-electronics.vercel.app>

Developed a full-stack e-commerce web application designed to simulate a real-world online shopping platform. The system includes secure user authentication with registration and login functionality, allowing users to create accounts and access personalized features. Built with a responsive design approach, the platform ensures a seamless user experience across mobile, tablet, and desktop devices. The application focuses on smooth product browsing, structured layout, and intuitive navigation to enhance usability and engagement.

2) Sketch Tech Solutions – Company Website & Marketplace

□ <https://sketchtechsolutions.vercel.app>

Designed and developed a professional company website for a tech services brand, alongside an integrated marketplace for showcasing products and services. The platform includes a structured presentation of offerings and a built-in contact and support system to facilitate communication between clients and the business. Special attention was given to user experience, ensuring a clean, modern, and professional interface that reflects the brand identity while maintaining ease of navigation.

3) Personal Portfolio Website

□ <https://sketch-tech-gif.github.io/my-portfolio>

Built a personal developer portfolio to showcase technical skills, projects, and professional capabilities in a structured format. The website includes a functional email contact feature to enable direct communication with potential clients or employers. Designed with a modern and responsive layout, the portfolio is optimized for performance, accessibility, and cross-device compatibility, ensuring a smooth user experience across all screen sizes.

EDUCATION

Diploma in Computer Programming

Co-operative University of Kenya | 2023 – 2025

- Focused on software development fundamentals including programming principles, database systems, web development, and systems design
-

Kenya Certificate of Secondary Education (KCSE)

Chebara Boys High School | 2019 – 2022 | Grade: B

- Completed secondary education with a strong academic foundation in sciences, computer studies, and mathematics

ADDITIONAL INFORMATION

- Comfortable working remotely and collaborating with global teams across different time zones
- Strong communication skills with non-technical stakeholders and clients
- Fast learner with self-driven experience building full-stack projects from scratch
- Ability to work independently with minimal supervision while meeting deadlines
- Strong problem-solving mindset with focus on debugging and system reliability
- Experience translating business requirements into functional web applications
- Good understanding of version control and collaborative workflows using Git and GitHub
- Ability to quickly adapt to new technologies and development tools
- Detail-oriented with focus on clean UI, usability, and performance optimization
- Comfortable handling client feedback and iterating on project requirements
